How Mr. Davis was Put in Chains

On the morning of the 23d of May, a bitter trial was in store for the proud spirit—a trial severer probably, than has ever in modern times been inflicted upon any who had enjoyed such eminence. This morning Jefferson Davis was shac-

This morning Jefferson Davis was shackeled.

It was while all the swarming camps of the armies of the Potomac, the Tennessee and Georgia—over two hundred thousand bronzed and laureled veterans—were preparing for the grand review of the next morning, in which, passing in endless succession before the mansion of the President, the congaring military power of the nation conquering military power of the nation was to lay down its arms at the feet of the civil authority, that the following scene was enacted at Fort Monroe:

scene was enacted at Fort Monroe:
Capt. Jerome E. Titlow, of the Third Pennsylvania Artillery, entered the prisoner's cell, followed by the blacksmith of the fort and his assistant, the latter carrying in his hands some heavy and harshly rattling shackles. As they entered, Mr. Da: was reclining on his bed, feverish and weary, after a sleepless night, the food placed near him the preceding day untouched on his tin plate near his bedside.

Well? said Mr. Davis as they entered Well? said Mr. Davis, as they entered,

slightly raising his head.

I have an unpleasant duty to perform, sir, said Captain Titlow; and as he spoke the senior blacksmith took the shackles

from his assistant. Davis leaped instantly from his recum-

Davis leaped instantly from his recumbent attitude, a flush passing over his face for a moment, and then his countenance growing as livid and rigid as death. He gasped for breath, clutching his throat with the thin fingers of his right hand, and then recovering himself slowly, while his wasted figure towered up to its full height—now appearing to swell with indignation and then to shrink with terror as he glanced from the Cantain's ror, as he glanced from the Captain's face to the shackles—he said slowly and with a laboring chest:

My God! You cannot have been sent

My God! You cannot have been sent to iron me?

Such are my orders, sir, replied the officer, beckoning the blacksmith to approach, who stepped forward, unlocking the padlock and preparing the fetters to do their office. These fetters were of heavy iron, probably five-eights of an inch in thickness, and connected together by a chain of like weight. I believe they are now in the possession of Major General Miles, and will form an interesting relic.

relic.

This is too monstrous, groaned the prisoner, glaring hurriedly round the room, as if for some weapon, or means of self-destruction. I demand, Captain, that you let me see the commanding office. Can he retend that such shackles are required to secure the are country. are required to secure the safe custody of a weak old man, so guarded and in such a fort as this?

a weak old man, so guarded and in such a fort as this?

It would serve to no purpose, replied Captain Titlow; his orders are from Washington, as mine are from him.

But he can telegraph, interposed Mr. Davis, eagerly; there must be some mistake. No such outrage as you threaten me with is on record in the history of nations. Beg him to telegraph, and delay until he receives an answer.

My orders are peremptory, said the officer, and admit of no delay. For your own sake, let me advise you to submit with patience. As a soldier, Mr. Davis, you know I must execute orders.

These are not orders for a soldier, shouted the prisoner, losing all control of himself. They are orders for a jailor—for a hangman, which no soldier, wearing a sword chould accept! I tell you the world will ring with this disgrace. The war is over; the South is conquered. I have no lorger any country but America, and it.: for the honor of America, as for my own honor and life, that I plead against this degradation. Kill me! kill me! he cried passionately, throwing his arms wide open and exposing his as fix my own honor and life, that I plead against this degradation. Kill me! kill me! he cried passionately, throwing his arms wide open and exposing his breast, rather than inflict on me and my people through me this insult, worse than death.

death.

Do your duty, blacksmith, said the officer, walking toward the embrasure as if not caring to witness the performance. It only giv s increased pain on all sides to protract this interview.

At these words the blacksmith advanced with the shackles, and seeing that the prisoner had one foot upon the chair near his bedside, his right hand reating on the back of it, the brawny mechanic made an attempt to slip one of the shackles over the ankle so raised; but with the vehemence and power which frenzy alone can impart, even to the weakest individual, Mr. Davis suddenly seized his assailant and hurled him half way across the room.

I am a prisoner of war, fiercely retorted Mr. Davis; I have been a soldier in the armies of America, and know how to die. Only kill me, and my last breath shall be a blessing on your head. But while I have life and atrength to resist, for myself and for my people, this thing shall not be done. not be done.

Hereupon Captain Titlow called in a

Sergeant and file of soldiers from the next room, and the Sergeant advanced to seize the prisoner. Immediately Mr. Davis flew on him and seized his musket and attempted to wrench it from his

but, thank God, I never sought my own death but once, and then when com-plotely frenzied, and not master of my actions. When they came to iron me that day, as a last resource of desperation, I seized a soldier's musket and attempted to wrench it from his hands, hoping that in the scuffle and surprise some of his comrades would shoot or havonet me bayonet me.

A WIFE'S FIDELITY.

Reunion After a Separation of Twenty Five Years.

There is now living in this city a lady whose life so far has been filled with more real romance than are the most del-cately wrought characters of fiction. icately wrought characters of fiction. Twenty-five years ago she was married to a man who like herself was in humble though respectable life. Their court-ship had been pleasant, and for aught the lady knows, harmonious and mutually agreea'le. On the day following the wedding, however, the husband left home without any apparent reason or any warning whatever. The wife merely supposed at the time that business had called him hence and that he would soon return. Days, weeks, months, years called him hence and that he would soon return. Days, weeks, months, years passed before she was ware that she was passed and wronged woman. She passed before she was a deserted and wronged woman. She heard nothing from him, but could not entertain the idea that he was dead, and instinctively believed that she would again see him. And just as she became convinced that she was deserted her martyrdom between She was deserted her martyrdom between She was deserted her martyrdom between She was deserted her martyrdom. again see him. And just as she became convinced that she was deserted her martyrdom began. She was thrown entirely upon her own resources for subsistence, and they were simply honest toil, a living faith in the reward of duty-doing, and a great self-sacrificing spirit. Thus she toiled on never hearing a word from her husband for many years, but still clinging to the strict and self-imposed duty of silent forbearance. One day after eight years she accidentall met him but he failed to recognize her. She did not speak to him, but learned from others that since his departure he had led a roving life, and had been in every State in the Union. Now that she knew he lived and yet did nothing tofaid her in her battle of life her action toward him, herself and the world remained unchanged. And just here she exhibited to a great degree her almost saintly character, for instead of accepting any of the numerous advantageous offers of marriage which she might have done, she silently did her everyday work, bearing his name and cherishing the same affection for him that induced her to become his wife.

wife.

There was another long time that she neither saw nor heard from him. But fato seemed to favor her, and again she met him by accident. He acted pleased to see her, told her what he had been doing, that he was still her husband, but never referred to his strange departure, nor offered her any means of support. Their conversation was a brief one, and they parted without enmity. Neither had an idea of the plans of the other, nor asked to know. The next that the wife knew of her husband was learned from a newspaper. There she saw, that he had been arrested for leading the Fenian riots in Canada, and was sentenced to be have. nian riots in Canada, and was sentenced to be hung. A subsequent report in-formed her that his sentence was com-muted to six years' imprisonment. Dumuted to six years' imprisonment. During those six years she retained her love for him and clung to the faith that her constancy would eventually be recognized and appreciated. After the man was let out from the prison cell he again became an adventurer and again accidentally met his wife. He said to her, "What did you think when you saw me sentenced to be hung?" She replied, "I supposed you would be hung." A short interview, in which neither learned the plans of the other, was the result of the meeting. And again he was off. After several more years they again met, recognized, but passed by in silence.

Strange as has been the first act of this

As dream-like and unnatural as all this may seem, it is asserted to be true by a responsible and highly esteemed young lady, whose relations with the wife gave her the means of knowing the particulars of the extraordinary romance.—Milwaylie, Wisconsin waukie Wisconsin.

Desperate Attempt to Escape Jail.

vanced with the sheckles, and seeing that the prisoner had one foot upon the chair near his bedside, his right hand resting on the back of it, the brawny mechanic made an attempt to slip one of the shackles over the ankle so raised; but with the vehemence and power which frenzy alone can impart, even to the weakest individual, Mr. Davis suddenly seized his assailant and hurled him half way across the room.

On this Captain Titlow turned, and seeing that Davi- had backed against the wall for further resistance, began to remonstrate, pointing out in brief, clear language that this course was madness, and that the order must be enforced at any cost. Why compel me, he added, to add the further indignity of personal violence to the necessity of your being ironed?

I am a prisoner of war, fiercely retorted the door of the hall and bent slightly forward to set the water on the floor, and noticed that Jack Bowers was eating. At this moment Henry Thomas, who had secreted himself just behind the door, reached forward and clasped his hands in a deadly grip around Skelton's throat and Jack ran forward to help Henry. They choked Skelton until he gradually gave way, and they all tumbled down stairs together, Henry still clinging to Skelton's throat, and Jack ran his hands in Skelton's pockets to get the key of the outside door, which Skelton takes the precautior to lock. They failed to get the key, however, as Skelton hides the key elsewhere than on his person. Will Pullman, who had brought the cakes to George, than ran to the rescue of Skel-

and attempted to wrench it from his grasp.

Of course such a scene could have but one issue. There was a short, passionate scriffle. In a moment Davis was flung upon his bed, and before his four powerful assailants removed their hands from him the blacksmith and his assistant had done their work—one securing the river on the right ankle while the other turned the key in the padlock on the left.

This done, Mr. Davis lay for a moment as if in a stupor. Then slowly raising himself and turning round, he dropped his shackled fact to the floor.

The hards clank of the striking chain seems first to have recalled him to his situation, and dropping his face into his heards, he surest into a passionate flood of sobbing, rocking to and free, and muttering at brief intervals: Oh, the shame!

It may here be stated, though out of it due order—that we may get rid in haste of an unpleasant subject—Mr. Davis some months later, when frequent visits had made him more free to converse, gave a curious explanation of the last feature in this incident.

He had been speaking of suicide, and denounced it as the worst form of cowners, gave a curious explanation of the last feature in this incident.

Thoughts for the Month.

Summer crops being laid aside, au umn crops at once claim attention. ground during this mouth being generally dry and hard, everything should be in readiness to speed the ploughs whenever a shower of rain falls. Have ploughs sharpened, gear put in order and everything ready to hitch up at a moment's notice. Stop at once everything else which interferes, as soon as rain comes. Clover, turnip, rye and barley land needs to be put in finest tilth by the middle of September, and there is no time to lose. Plough, cross-plough, harrow and drag whenever the land is in order. Haul out manure (stable or compost) at once, so that no mule will be kept out of the plough after rain falls. Some farmers seldom fail to get these crops started in good time—others fail oftener than they succeed, and the cry is "bad luck," no rain, whilst the truth is, good or bad management is at the bottom of it all. One looks well ahead and makes his arrangements accordingly—the other looks round during this mouth being generalrangements accordingly—the other looks little beyond the end of his nose, and is never ready when the golden moment

we publish in this number a very timely article from the experienced gardener, Mr. Peter Henderson, on firming the soil as a means of encouraging the the soil as a means of encouraging the germination and growth of seeds in dry weather. We have repeatedly noticed facts such as he describes in our own experience, and have for years adopted the plan of pressing small seeds down in the drill, either by foot or with the edge of a thick plank. The past spring, in planting some corn when the earth was quite dry, we had the droppers step upon the grains as they dropped them, and the result was one of the best stands of corn we ever had. In broad casting seed, the "firming" can only be done by passing a heavy roller over the land after the seed are ploughed, harrowed or brushed in—a practice long and heartily advocated by practice long and heartily advocated by the best farmers in grain and grass growing countries.

Our readers will not be offended if we

ing countries.

Our readers will not be offended if we urge upon them to devote quite a large area to fall crops—a country afflicted with such disastrous summer droughts as visit us, ought to push winter crops to the utmost. These crops are also commended to us by the comparatively small amount of labor they require—the planting and the gathering sum up the whole. A farmer within our knowledge, by sowing four acres to the mule in oats, made this year (notwithstanding the dry spring) enough oats to feed each mule 7 months without other grain or forage, and an abundance for seed purposes in addition. Suppose every farmer in the South had done likewise, how little corn would suffice to bridge over another year. If it has not been done, and the supply of food is too short to last till next year's crops are laid by, what then—buy Western corn! By no means—begin at once to take steps to supply the deficiency by home grown crops. First give the peas already planted, all the working needed to make a full crop, and, when made, gather and store away in the hull, to be fed in that state. Where the crop does not promise a fair yield of seed, cut the vines and cure them; if mixed with grass so much the better. If roofing can be had, cure in rail or pole pens, making a floor of same 6 or 8 inches above the ground, putting in a layer of green vines 2 feet thick, then another floor. then a moor of same 6 or 8 inches above the ground, putting in a layer of green vines 2 feet thick, then another floor, then vines, and so on, as high as desired. If roofing cannot be had, put stout stack poles securely in the ground and, beginning 18 inches from the ground, nail on cross pieces or arms decreasing the attention. ning 18 inches from the ground, nail on cross pieces or arms, decreasing in length as you go upwards, and standing off in every direction like the limbs of a tree. Make an open rail floor one foot from the ground and build up a stack with the green vines, shaping and capping it so as to shed rain. An old field pine if conveniently situated can be trimmed, leaving the large part of its limbs as arms, and answer quite as well as the stack pole. The green vines arranged in either of above ways, will soon shrink, and being unable to settle down into a compact mass, on account of the arms or limbs, will cure beautifully; and being unexposed to the sun will retain their leaves.

and set them more at right angles on the snath than you would a regular grass blade. They can be made (if sharp) to do very good work in tall tangled grass. Cut down also and cure in shocks, all the stalks of corn which have not produced ears—do this grantly as possible. duced ears—do this as early as possible. So much for material already on hand. Now for crops that may be planted and utilized early next season.

Clover stands at the head of the list

Clover stands at the head of the list—red clover in strong clay and limestone soils; crimson, California or burr clover in all soils if rich. The last two are annuals—planted next mouth they will flower and produce seed next spring and then die. For feed early in the spring, they are probably to be preferred to red clover, unless one had contemplated sowing the latter for other reasons. The California clover is not always relished by stock at first, they must be taught to eat it—the crimson is fully as palatable to them as red clover. Put the land in good tilth, manure heavily with stable manure, crushed cotton seed or cotton seed meal and 100 or 150 lbs. of superphosphate per acre—and sow of crimson clover 15 pounds per acre, of Califarnia clover 3 or 4 bushels per acre (the seed of the latter being in the burr) and harrow or brush in and then roll. By the first of March, or possibly earlier, you can cut and feed to stock. We do not recommend lucerne in an emergency, such as a row under consideration. recommend lucerne in an emergency, such as now under consideration, because it is when young more delicate than the above plants, and more uncertain the first season.

first season.

The next in value is barley—admirable both for grazing and soiling—early and nutritious—furnishing also matured grain for stock feed earlier than any other crop we can grow. Can be harvested in May, from 3 to 4 weeks earlier than oats. The threshed grain, soaked in water or crushed in the mill, makes excellent horse feed. All know it must be sown on rich land—for grazing 3 to 4 bushels per acro—for seed 2 bushels will answer.

The main dependence must, however, be placed upon outs—sown from the Company of the c

be placed upon oats—sown from 1st Sep-tember to middle October, according to latitude, or again early in January. Those sown in January will not mature quite as early as those sown in autumn. The red rust proof on good land is the most certain, and at least two bushels seed per acre should be sown —on excess-ively rich land as much as 4 bushels per rvery rich land as much as 4 bushels per acre may be sown. The thicker the seeding, the earlier the maturing. Prepare the land well, feed the crop well, and don't retard growth by grazing, unless it be necessary in fall to prevent "jointing" before the freezes come. Perhaps it would be well to divide the crops and take two chances, sowing a part in an take two chances, sowing a part in au-turn and a part in January. The latter sowings in our own experience have been

sowings in our own experience have been very successful.

They have this advantage, that they can be made in cotton land, and the seed thoroughly ploughed and harrowed in, without interfering with the cotton crops. They can be manured also with cotton seed without the necessity of killing or crushing them. Sow the first open spell in January—we have succeeded well, however, by sowing as late as the last week in the month. If sowings are made in cotton fields in September, follow the pickers with the ploughs—siding the cotton as clean as possible, then sow seed and cover with sweep or harrow. and cover with sweep or harrow. Mr. Bowerman Packs II's Wife's Trunk.—Mr. Bowerman and wife left for the country yesterday. One could tell that their trunks were net over half full, as they were pitched into the baggage car with a crash. They began packing a week ago. When the subject was broached he said he preferred to pack his own trunk, and he didn't propose to take a whole month to it, either. All he intended to take along was an extra suit, and could throw that in most any way. Night before last he began work. It struck him that he'd better put in an extra pair of boots as a foundation, and he flung 'em in and braced 'em in the corners with his clean shirts. The shirts didn't seem to ride very well, and he braced them with two pairs of trowsers. Then he stuffed his Sunday coat pockets with collars and cuffs, and found a place for it, used his white vests for "chink-ing". I edge of the ribs, increases on pressure; sometimes the pain is in the left for it, used his white vests for "chink-ing," and the balance of his clothing just fitted in nicely.

"The man who takes over ten minutes side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder blade, and i frequently extends to the top of the shoulder, and is sometimes mistaken

to pack a trunk is a doit!" said Mr. Bowerdian, as he slammed down the lid and
turned the key.

Mrs. Bowerman had been at it just
seven days and seven nights, and when
the husband went up stairs at 10 o'clock
she sat down before the open trunk with
tears in her over

to pack a trunk is a dolt !" said Mr. Bow-

tears in her eyes.
"You see how it is," she explained, as "You see how it is," she explained, as he looked down upon her in awful contempt, "I've got only part of my dresses in here, to say nothing of a thousand other things, and even now the lid won't shut down. I've got such a headache I must lie down for a few minutes."

She went away, and Mr. Bowerman sat down and mused:

"Snace is space. The use of space is

"Space is space. The use of space is in knowing how to utilize it." in knowing how to utilize it."

Removing everything, he began repacking. He found that a silk dress could be rolled to the size of a quart jug. A freshly-starched lawn was made to take the place of a pair of slippers. Her brown bunting fitted into the niche she had reserved for three handkerchiefs, and her best because. her best bonnet was turned bottom up in its box and packed full of underclothing. He sat there viewing sufficient empty space to pack in a whole bed when she returned and said he was the only real good husband in this world, and she kissed him on the nose as he turned the

key. "It's simply the difference between the sexes," was his patronizing reply as he went down stairs to turn on the burglar

When that wife opened that trunk last night ———! But screams and shricks would avail nothing.—Detroit Free Press.

A WONDERFUL GEORGIA WOMAN.— The following particulars we get from Mr. George C. Watson, living near the Mr. George C. Watson, living near the home of the subject of the sketch: A lady of the Seventh district of Worth county has become insane on the subject of religion. Her dementation was first noticed about a month ago, soon after the close of a protracted meeting at Union Baptist church, near her home. She attended the different services very regularly, and seemed deeply impressed and troubled from their first commencement. A short while before the meeting closed she joined the church. Going ment. A short while before the meeting closed she joined the church. Going back home her incoherent, maddened and rambling conduct was noticed by her husband and children, and they became terribly excited and wrought up about it. She went raving about the house and yard with a bucket of water, baptising everything in her pathway. She baptised her husband and each one of her children, and while doing this sang the most beautiful songs—songs that she had heard but once or twice. Although an unlettered woman (her hus-Although an unlettered woman (her husband will swear this,) she reads any chapter in the Bible readily, pronouncing correctly and distinctly, paying at-tention to punctuation points, &c. She preaches nearly all the while, and our informant says uses the choicest words informant says uses the choicest words and displays great wisdom and knowledge in the handling of different subjects. Although not a Mason, she knows all the mysteries of that mysterious craft by heart. Dozens of Masons have gone to see her, and they all come away dumbfounded. Her husband has come to the conclusion that she is a witch. She has attempted sets of violence but a sure of the conclusion that she is a witch. leaves.

In addition to pea vines, cut and save all the crab or other grass to be found. Where long scythes cannot be used (as in corn fields) get the short stout blades, in corn fields) get the short stout blades, but the doors became unmanageable and known as "bush" blades (not "books")

her in one of the rooms of the house, but the doors became unmanageable and wouldn't stay locked. She hasn't slept in eighteen days and nights, and during that time has taken but few morsels of food. This is one of the strangest cases we have ever heard of. Hundreds are flocking to see the frenzied woman.—Albany News.

"Mrss."—A woman who opened a small millinery store in the western part of the city, engaged a painter to paint her a sign. When it came home the other day she saw that it read: "Mrss. J. Blank," etc., and she called out:

"You have an extra 'S' in Mrs., and you must paint the sign over again."

The painter saw the error, but he didn't want the job of correcting it, and he replied:

"Madam, haven't you had two hus-

plied: "Madam, haven't you had two hus-

"Yes, sir."
"You were a Mrs., when you lost the first?" "I was."

"And do you think a woman can go on marrying forever and not lengthen out her title? 'Mrss.,' means a married woman who has been married twice and is young enough to marry again, and only yesterday a rich old coon was in our shop and said if he had any idea that you were heartfree he would come up—"
"Oh, well, then, you can nail up the sign," she interrupted, and it is there to-day.

Fat People's Misfortune.

Some of the savage tribes enter their dwellings through a hole in the roof, and when a person becomes so fat that he cannot get in, he is regarded as an outlaw. Had this system been adopted in the United States, the "outlaws" could not have made a more active demand for Allan's Anti-Fat than now exists. Hundreds who had lived in constant fear of sudden death have, by its use, been reduced to a comfortable living weight. The Anti-Fat is purely vegetable and perfectly harmless. Sold by druggists.

S. T. W. SANFORD, M.D., NEW YORK CITY
AND DECEMBER WILL TELL FOR LIFE REPLATION. cise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms: ttend the disease, but cases

SMITH'S WORM OIL! have occurred where few of them existed, yet examination of the body, after death, has shown the LIVER to DR. C. McLane's Liver Pills, in cases of Ague and Fever, when taken with Quinine, are productive of the most happy results. No better cathartic can be used, preparatory to, or after taking Quinine. We would advise all who are afflicted with this For all bilious derangements, and as a simple purgative, they are unequaled.

ATHENS, G.A., December 8, 1878.

A few nights since I gave my son one dose of the Worm Oil, and the next day he passed sixteen large worms. At the same time I gave one to my little girl, four years old, and she passed eighty-six worms from four to fifteen inches long.

W. F. PHILLIPS.

WORM OIL for sale by Drussists generally. Prepared by E. S. LYDON, Athens, Georgia. Price 25 cents.

MARABLEED A LIMITED NUM. The genuine are never sugar coated. Every box has a red wax seal on the lid, with the impression Dr. McLane's Liver The genuine McLane's Liver Pills bear the signatures of C. McLane and Fleming Bros, on the wrappers.

Insist upon having the genuine Dr. C. McLane's Liver Pills, prepared by Fleming Bros., of Pittsburgh, Pa., the market being full of imitations of the name McLane, spelled differently but same pronunciation.

WANTED A LIMITED NUM-BER of active, ener-gage in a pleasant and profitable business. Good men will find this a rare chance

It is too soon to forget the ravages of this terrible disease, which will no doubt return in a more malignant and virulent form in the fall of 1879.

MERRELL'S HEPATINE, a Remedy discovered in Southern Nubla and used with such wonderful results in South America where the most aggravated cases of fever are found, causes from one to two ounces of bile to be filtered or strained from fine blood each time it passes through the Liver, as long as an excess of bile exists. By its wonderful action on the Liver and Stomach the HEPATINE not only prevents to a certainty any kind of Fever and Black Vomit, but also cures Headache, Constipation of the Bowels, Dyspepsia and all Malarial diseases.

No one need fear Yellow Fever who will expel the Malarial Poison and excess of bile from the blood by using MERRELL'S HEPATINI which is sold by all Druggists in 25 cent and \$1.00. tites, or will be sent by express by the Proprietors,

A. F. MERRELL & CO., Phila., Pa. TO MAKE MONEY. Such will please answer this advertisement by letter, enclosing stamp for reply, stating what business they have been engaged in. None but those who mean business need apply. Address, FINLEY, HARVEY & CO., March 20, '79—1y Atlanta, Ga.

WANTED A No. 1 YOKE of OZEN. APPLY TO

A MIRACLE.

WEST POINT, GA., Sept. 16, 1870.

GENTS—My daughter was taken on the 25th day of June, 1863, with what was supposed to be Acute Rheumatism, and was treated for the same with no success. In March, following, pleces of bone began to work out of the right arm, and continued to appear till all the bone from the elbow to the shoulder joint came out. Many pleces of bone came out of the right foot and log. The case was then pronounced one of White Swelling. After having been confined about six years to her bed, and the case considered hopeless, I was induced to try Dr. Pemberton's Compound Extract of Stillingia, and was so well satisfied with its effects that I have continued the use of it until the present.

My daughter was confined to ber hed about six years before she sat up or even turned over without help. She now sits up all day, and sews most of her time—has walked across the room. Her general health is now good, and I believe she will, as her limbs gain strength, walk well. I attribute her recovery, with the bleasing of God, to the use of your invaluable medicine.

With gratitude, I am yours truly,

W. B. BLANTON. J. M. Matthews, Belton, S.C. (Formerly of Ninety Six.)

BRADLEY'S PAYENT PHOSPHATE

COMBAHEE ACID PHOSPHATE.

WE are agents for the above celebrated Fertilizers, having sold Bradley's Patent for several years, we know it to be good. As to the ACID there is none better. See Mr. B. A. Davis' certificate attached. Could give more, but one is sufficient. Our terms are as favorable as any Standard Guano. Give us a call before buying.

A. B. TOWERS & CO.

ANDERSON, S. C., Sept. 30, 1878—Messrs. A. B. Towers & Co.—Dear Sirs: I beg leave to say to you that I am well pleased with the Bradley's Guano that I bought of you last Spring. In fact I do not think there is any other guano equal to it except perhaps one other, and there is no man who has used a greater variety of fertilizers than I have. I shall want it again, and a great many of my neighbors expect to use it next year, just Feb 13, 1879
